¹Full Amendments: The WWVMPO/SRTPO deadline gives staff time to arrange for public notifications, to prepare submittal documentation, and to conduct a two-week public comment period. Full amendments require approval by resolution from the Policy Board and, depending on the nature of the amended project, may be subject to an air quality conformity determination, unless the project is exempt. ([49 CFR 93.126](#))

Administrative/Technical Adjustments: Minor administrative, scope, or funding changes do not require public review or committee approval. Oregon agencies should submit materials **two weeks** in advance to give WWVMPO/SRTPO staff time to process the adjustment and to prepare the submittal to the Region 5 STIP Coordinator.

Submittal to ODOT: TIP amendments are continuously processed by ODOT and there are no established submission deadlines. However, for full amendments, the WWVMPO/SRTPO follows the shown schedule to allow for required public comment and committee approval.
